Search Pro V4 Documentation

Everything you need to install, set up and use Search Pro V4 for 3DVista Virtual Tours.

Version 4.0

Where to Start

Pick what you want to do.

Installation Guide

From the zip file to a working search in your tour, step by step.

Coming From Version 3

Keep your button and your settings. Change the folder and two lines.

Settings Reference

Every setting of the Control Panel: what it does, its choices and its default.

Third-Party Components

The open-source parts inside the plugin, with their licenses.

Terms and Conditions

The terms of use of Search Pro V4.

In Short

The whole path, in six steps. The Installation Guide has the details of each.

1. **Put the `search-pro-v4` folder at the same level as your tour files**

   It goes in the same folder as the rest of your tour, the folder that holds `index.html`. See Put the Folder in Your Tour.

2. **Add the search button in 3DVista**

   A button with one JavaScript action. See Add the Search Button.

3. **Add two lines to `index.html`**

   They load the search and your settings. See Add Two Lines to index.html.

4. **Upload the tour and the folder**

   See Upload to Your Server.

5. **Open the Control Panel and choose your settings**

   See Open the Control Panel.

6. **Download your settings file `search-pro-config.js` and upload it**

   Visitors see your settings after this step. See Save and Publish Your Settings.

What the Control Panel Has

One tab for each part of the search. The Settings Reference follows the same order.

TAB	USE IT TO
General	Choose how the search opens and closes, how it finds results, and where it sits on computers and phones
Appearance	Choose the colors, corners and text of the search field and the results
Display	Control how results look and what they show
Content	Choose which elements of the tour visitors can find in the search
Filtering	Choose which results are left out of the search, by name, tag or number
Data Sources	Use a Google Sheet or a CSV file to change how items look in the search results; the tour itself is never changed
Animations	Choose how the search bar, the results and the hover effects move
Advanced	See what the search finds in your tour and tune how it matches what visitors type
Knowledge	How to add the search to a tour, how your settings reach visitors, what each tab does and what to check when something does not work
